

Suomen Viljava Ltd Grain Terminal Services

Port of Masfalu

Grain Terminal Services in the Port of **Naantali**

Naantali port silo is the largest grain terminal of Suomen Viljava Ltd, with a total capacity of 230,000 tonnes. The annual throughput is about 300,000 tonnes.

Suomen Viljava Ltd in the port of Naantali has experience in handling grain, malt, peas, rice, rape seed and soya beans. There are 52 silos for 3,800 tonnes each and 60 silos for 1,000 tonnes each.

Naantali is located close to the milling and feed industry, and the port is kept open by ice-breakers during cold winters.

Loading and unloading of Russia-bound train wagons is also possible.

The Port of Naantali is a secure and well protected area which meets international ISPS security requirements.

Suomen Viljava's services comply with ISO 9001 and GTP standards, and are certified by USDA to store and handle organic grain.

Suomen Viljava Ltd is Finland's largest grain handling and storage company. It has stores and silos at 21 locations, five of them in ports. The total storage capacity is 1.4 million tonnes.
